REPORTS ON STANDARDIZATION AND INTERCALIBRATION  
OF OCEANOGRAPHIC TECHNIQUES AND METHODS

Introduction

The following reports have been reproduced for circulation to oceanographers. A complete list of reports available from the Office of Oceanography, Unesco, is shown in International Marine Science, Vol. 1, No. 1, and numbers given in the Index refer to entries in the above-mentioned publication.

No changes in the text have been made to the reports as received by the Office of Oceanography, Unesco, but recent activities by national and international groups concerned with oceanographic methodology have added considerably to the experience of scientists working in this field. These reports are being distributed for information and should not be regarded as being recommended by Unesco.
