INDIA

December, 1966

A Selected bibliography of the Indian Ocean

1962—1966

*Issued by*

THE INDIAN NATIONAL COMMITTEE ON OCEANIC RESEARCH  
COUNCIL OF SCIENTIFIC & INDUSTRIAL RESEARCH  
NEW DELHI

## **F O R E W O R D**

During the International Indian Ocean Expedition some efforts were made to prepare a compiled list of publications in different disciplines of oceanography with particular reference to the Indian Ocean. The bibliographic compilation was meant to help the different participating countries and agencies in formulating the scientific programmes and fill in the gaps wherever necessary. One of the most comprehensive, if not exhaustive, of these is that published by the Woods Hole Oceanographic Institution in June 1962, entitled "A partial bibliography of the Indian Ocean" and this contained a fairly large collection of titles of papers published till the year 1962. Subsequent to this publication there does not appear to have been any serious effort to issue similar lists.

With the increasing interest in oceanographic studies in India both during the Indian Programme of the International Indian Ocean Expedition (1962-65) and following that period, the necessity has arisen to provide the scientific workers in India a ready reference of publications in oceanography relating to the Indian Ocean. The present compilation is meant to fulfil this need and includes publications from 1962 to 1966. This does not claim to be an exhaustive list, but in this we have been able to cover several important publications in the field.

This compilation has been done by Dr. S.N. Dwivedi, Scientist, assisted by Sarvashri R.M.S. Bhargava, S. Venkataraman, L.V. Gangadhara Rao and M.G. Seshagiri Rao, of the National Institute of Oceanography.

New Delhi.  
December, 1966.

**N. K. Panikkar**
